RE: Ventura County APCD Rule 74.11.1 – Certification of Units

Dear Ms. Wilson:

Per your letter dated July 29, 2011, the units listed on the attached table have been certified for sale and installation in Ventura County.

This certification is pursuant to Ventura County Air Pollution Control District Rule 74.11.1, Large Water Heaters and Small Boilers, and is valid for a period of three (3) years from the date of this letter. Rule 74.11.1 applies to units with a rated heat input capacity greater than 75,000 BTU/hour and less than or equal to 2,000,000 BTU/hour.

You should be aware that units with a rated heat input capacity of 1,000,000 BTU/hour, or more, require an APCD Authority to Construct prior to installation and must meet the District's definition of Best Available Control Technology (BACT) at the time the Authority to Construct is issued.

The Ventura County APCD does not endorse or warranty any specific product or manufacturer. Modification of the products listed above will void this certification.

If you have any questions on this matter, please contact me at 805/645-1403.

Sincerely,

A handwritten signature in black ink, appearing to read "Ken Hall".
