VENTURA COUNTY AIR POLLUTION CONTROL DISTRICT BOARD MEMBERS

BRIAN BRENNAN
Chair
Council Member, City of San Buenaventura

KATHY I. LONG
Vice-Chair
Board of Supervisors - District III

STEVE BENNETT
Board of Supervisors - District I

MIKE MORGAN
Mayor, City of Camarillo

PETER C. FOY
Board of Supervisors - District IV

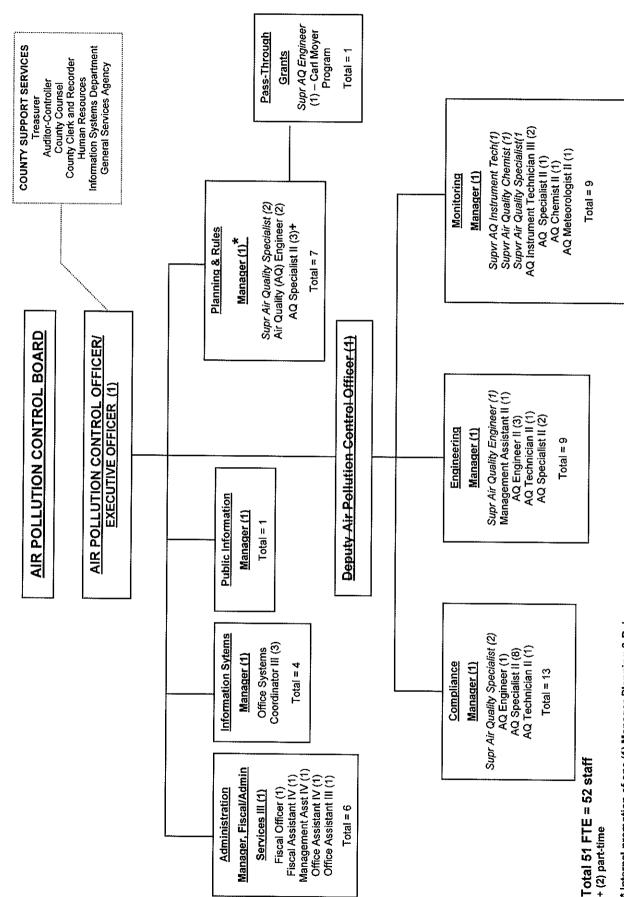

CARMEN RAMIREZ
Council Member, City of Oxnard

LINDA PARKS
Board of Supervisors - District II

JONATHAN SHARKEY Council Member, City of Port Hueneme

JOHN ZARAGOZA
Board of Supervisors - District V

GAYLE WASHBURN Mayor, City of Fillmore

* Internal promotion of one (1) Manager-Planning & Rules

MISSION STATEMENT

To protect public health and agriculture from the adverse effects of air pollution by identifying air pollution problems and developing a long-range comprehensive program to achieve and maintain state and federal air quality standards.

The District was formed by the County Board of Supervisors in 1968, in response to the County's first air pollution study that identified Ventura County as having a severe air quality problem. Currently, Ventura County does not meet the federal air quality standard for ozone. It also exceeds the state standard for ozone and particulate matter (PM10).

The Air Pollution Control District (APCD) has a staff of 52 employees (51 full-time equivalents) including inspectors, engineers, planners, technicians, and support staff. The District works with business and industry to reduce emissions from new and existing sources. The District is divided into divisions: Administration, Information Systems, Compliance, Engineering, Monitoring, Planning and Evaluation, Rules and Incentives, and Public Information.

MAJOR DISTRICT PROGRAMS INCLUDE:

- Air Quality Management Plan (AQMP) implementation.
- Permit processing and renewal.
- Enforcement of APCD rules and applicable state and federal laws.
- Air quality and meteorological monitoring at seven locations throughout the county.
- Air quality impact analyses of sources and projects for AQMP consistency.
- Air quality, meteorological, and agricultural burning forecasting.
- Rule development.
- Air pollution emissions inventory.
- Air toxics inventory and risk assessment.
- Transportation control measure development.
- Employer transportation outreach program.
- Incentive programs for emission reduction projects.
- Public information and education.

MAIN GOALS:

- Attainment of federal and state ambient air quality standards.
- Implement the requirements of the California Clean Air Act and 1990 Amendments to the federal Clean Air Act.
- Continue public awareness program and education program.
- Develop attainment plans for new U. S. Environmental Protection Agency (EPA) ambient air quality standards

OBJECTIVES

PLANNING DIVISION

To develop a comprehensive plan for achieving health-based federal and state clean air standards.

Ventura County residents currently breathe air that does not meet federal and state health standards for ozone or state particulate matter standards. In an effort to clean up the air to meet health standards, the Air Pollution Control Board has adopted an Air Quality Management Plan (AQMP), which identifies the necessary programs to achieve healthful air. These programs include stationary source control measures implemented by the District, mobile source measures to be implemented by the U.S. Environmental Protection Agency, mobile and area-wide measures to be implemented by the California Air Resources Board (ARB) and other state agencies, and a variety of other measures to be implemented by the District, local cities, and other local agencies.

As part of the District's ongoing planning effort, staff evaluates current and historical air quality levels, estimates current air pollutant emissions from a wide range of sources, develops emission control programs to achieve clean air countywide, calculates the level of emission reductions associated with current and future control programs, forecasts future emission levels accounting for growth and control trends, and uses air quality models to determine the required emission reductions to meet air quality goals.

To evaluate the air quality impacts of projects under the California Environmental Quality Act (CEQA).

The primary goal of CEQA is to provide and maintain a high-quality environment. To achieve this goal, CEQA requires that public agencies in California identify and disclose the significant environmental effects of their actions and avoid or mitigate those effects, where feasible. Staff participates in the preparation and review of environmental documents prepared by the County of Ventura, local cities, and other public agencies to determine potential adverse air quality impacts from projects, and identifies measures to mitigate those impacts.

Staff has also developed *Air Quality Assessment Guidelines*, for use by local agencies, environmental consultants, and project proponents. These guidelines recommend procedures to evaluate the air quality impacts of proposed projects and mitigate those impacts to acceptable levels. They are revised on a periodic basis to update emission factors, alternative mitigation measures, air quality information, and other information.

To develop and implement measures to reduce motor vehicle emissions associated with urban growth.

On-road motor vehicle emissions account for more than half of the ozone-forming emissions in Ventura County. Consequently, the District's AQMP relies on a wide range of programs

implemented by federal, state, and local agencies to reduce mobile source emissions to achieve clean air. Staff coordinates with these agencies to ensure that programs are implemented as expected, identifies opportunities where additional emission reduction programs can be implemented, and reviews agency actions to ensure that they will not interfere with efforts to reduce mobile source emissions.

To prepare and update the area, natural, and mobile source county emissions inventories on an ongoing basis.

An air pollutant emissions inventory is one of the cornerstones on which the District's comprehensive air quality plan is based. This inventory allows the District to determine what programs are necessary to achieve clean, healthful air, and to evaluate the effectiveness of the individual emission control measures. District staff works with staff of the California Air Resources Board and industry representatives to compile and update information on quantity of air pollutants emitted in Ventura County from mobile sources (on- and non-road), natural sources, and dispersed area wide sources (such as consumer products, pesticides, and architectural coatings).

MONITORING DIVISION

To provide continuous measurement and analysis of countywide air quality and meteorology.

VCAPCD monitors air quality to assess the county's ongoing status with respect to federal and state health-based ambient air quality standards. Air quality and meteorological conditions are recorded at six aerometric monitoring stations located in El Rio, Thousand Oaks, Simi Valley (East and West), Ojai, and Piru.

Field operation technicians and meteorologists maintain and operate pollutant analyzers and sensors at the six monitoring sites so that continuous ambient air quality and meteorological data can be gathered. Staff also maintains a strict quality assurance and quality control program to ensure collected data are valid and representative. Data are processed and validated through the VCAPCD's aerometric data center for submittal to state and federal air quality data banks. Chemists also operate an atmospheric chemistry sampling and analysis program. VCAPCD's air quality laboratory is one of five regional labs in California funded to process fine particle sample filters from other counties, as well as Ventura County.

To notify school districts and the general public of air pollution health advisory episode predictions and occurrences.

Whenever an air pollution health advisory episode is forecast or whenever a health advisory episode level is attained, the VCAPCD immediately notifies local cities, school districts, and the general public through local media. Notifications are made by contacting a list of designated

representatives by email or telephone. These persons then make further notifications to affected parties.

To provide the public with a variety of air quality, climatological, and forecasting information.

Staff develops air quality summaries and reports for periodic publication and for response to public inquiries. Air Quality Index and agricultural burning forecasts are prepared twice daily and made available via recorded message, e-mail, and the VCAPCD's web site to media, the medical community, public assistance organizations, and school districts. Daily air quality forecasts and measurements are placed on the EPA's national air quality website (AIRNOW). Daily air quality forecasts are also provided on Twitter. At times, VCAPCD staff also prepares weather forecasts in conjunction with outside agencies for special projects or problems.

COMPLIANCE DIVISION

To conduct the APCD inspection program.

Compliance staff inspects all permitted air pollution-emitting facilities to assure their compliance with APCD rules and regulations and applicable provisions of the California Health and Safety Code and Environmental Protection Agency regulations. Permitted sources include, but are not limited to, gas stations, dry cleaners, auto body shops, oil field operations, semiconductor and electronics manufacturing facilities, municipal government operations, power plants, and chemical processing plants. Inspectors ensure that pollution-emitting facilities are properly permitted, operated, and source tested according to applicable rules and permit conditions. Source records are verified for all equipment, including continuous emission monitors. Unpermitted facilities are inspected to determine if they are subject to the District's permit requirements and rules and regulations. Inspectors may issue Notices of Violation, Notices to Comply, or Notices to Supply Information. Inspectors receive on-going training and attend courses on source-specific inspection techniques, air pollution control technology, and other methods of improving compliance.

To investigate citizen complaints.

Air pollution related complaints from citizens are investigated to determine the source of odors, dust, fumes, and other pollutants that may cause harm or discomfort to the public. Complaint investigations often require interaction with other agencies such as the County's Environmental Health Department, fire, building and safety, and code enforcement.

To conduct the APCD Mutual Settlement Program.

The Mutual Settlement Program offers a violator the opportunity to settle violations by payment of penalties in lieu of litigation. If compliance is achieved and the penalty is paid, the matter is

resolved. This program allows the District staff to educate the violator about the District requirements for that source and the necessity for compliance.

To monitor and evaluate source tests conducted by independent contractors at selected facilities.

District rules or conditions placed on permits may require regular measurement of pollutants being emitted by a facility. These "source tests" are conducted by independent contractors. District staff reviews the proposed test procedures prior to the test, monitors the testing process, and evaluates the test reports prepared by these contractors.

To organize and conduct special enforcement programs.

State law requires air districts to give approval before building occupancy permits are issued. This helps prevent the installation of unpermitted sources of air pollution, and unsupervised asbestos renovation and demolition projects. Staff interviews applicants for certificates of occupancy and building permits, and issues authorization to the planning or building and safety department only after the applicant complies with, or has been determined to be exempt from, APCD requirements.

Asbestos renovation and demolition projects are reviewed and inspected by District inspectors to assure that the projects are conducted according to District and federal rules and regulations. This District program ensures that asbestos renovation and demolition projects will not release asbestos containing materials that may harm the public health.

Annual compliance certifications submitted by companies that have been issued Part 70 (Title V) federal operating permits are reviewed by Compliance Division staff to assure that the certifications are complete and accurate. Enforcement action is initiated where the certifications indicate non-compliance.

Compliance Division staff participates in various local and state-wide compliance programs: the Ventura County Environmental Crimes Task Force; the California Air Pollution Control Officer's Association (CAPCOA) Enforcement Manager's Committee, and the CAPCOA Vapor Recovery Committee.

To represent the District before the Air Pollution Hearing Board.

Compliance staff represents the District before the APCD's Hearing Board; assists companies seeking variances; initiates petitions for Orders of Abatement; and assures that sources operating under variance and abatement orders maintain compliance.

To encourage the use of alternate forms of transportation.

The Transportation Outreach Program's objective is to reduce the number of single occupant vehicles operated by employees traveling home-to-work commutes. Transportation staff works

with employers to develop voluntary programs that encourage the use of alternate forms of transportation such as ridesharing, public transit, bicycles, telecommuting, and flexible work schedules. Transportation staff conducts annual registration and assists employers conducting biennial employee commute surveys.

ENGINEERING DIVISION

To evaluate and issue Authority to Construct and Permits to Operate to all applicable air pollution emitting facilities.

The District has a two-step permit processing program. Permits are required for new air pollution emitting facilities and modifications to existing air pollution emitting facilities. Facility operators are required to obtain an Authority to Construct before construction or modification begins. This allows District staff time to review the project plans and determine if the project will comply with all applicable District rules. The District integrates state and federal requirements for new source review into its Authority to Construct process. After construction is completed, but before operation begins, operators are required to obtain a Permit to Operate. A temporary Permit to Operate may be issued so that emissions testing or a District inspection may be conducted while the new or modified facility is operating. Upon determining that the facility is complying with all applicable APCD rules, District staff issues a Permit to Operate with enforceable permit conditions to ensure continuing rule compliance.

To issue federal operating permits to all major facilities.

The District is required to issue federal operating permits to all major air pollution emitting facilities in the District pursuant to Title V of the Clean Air Act. The permits must reflect all air pollution requirements applicable at the facility. All federal operating permits are subject to public review and approval by the federal Environmental Protection Agency. Modifications to these facilities may require additional review by the public and the Environmental Protection Agency.

To annually review and renew all Permit to Operate applications and collect fees.

Permits to Operate are reviewed and renewed annually. Permit renewal fees are a primary funding source for the District. Therefore, an important aspect of the renewal process is preparing bills and collecting renewal fees. The permit renewal process also affords staff the opportunity to review the enforcement history of the facility for the last year and to review the applicability of any new or amended District, state or federal rules or regulations to the facility in order to determine if any changes in permit conditions or permitted emissions are necessary.

To implement state and federal air toxics programs.

The District implements three air toxics programs: the state air toxics "Hot Spots" program, air toxics regulations promulgated by the federal Environmental Protection Agency, and air toxic regulations promulgated by the state Air Resources Board.

The goal of the air toxics "Hot Spots" program is to identify any facility whose emissions of toxic air pollutants may be creating a potential significant health threat to the surrounding community. Operators of facilities that have the potential to emit toxic air pollutants are required to submit an emissions inventory of toxic pollutants emitted from their facilities to the District. Based on the information contained in the inventories, the District determines which facility operators must prepare formal health risk assessments. If the health risk assessment shows that the risk is significant, the facility operator must notify the public of the health risk assessment results. The facility operator must then prepare and implement a plan to reduce the health risk.

The Environmental Protection Agency promulgates standards designed to require the application of the maximum achievable control technology (MACT) to facilities that emit hazardous air pollutants. The Air Resources Board promulgates airborne toxic control measures (ATCM), which supplement or supersede the federal MACT standards. The goal of the District program is to identify facilities subject to a MACT standard or an ATCM and to make appropriate modifications to the facilities' Permits to Operate. As required by the ATCM for Stationary Compression Ignition Engines, the District implements and operates an Agricultural Diesel Engine Registration Program. The program requires both initial registration fees and annual registration fees.

To prepare and update the county stationary source emissions inventory on an annual basis.

An air pollutant emissions inventory is one of the cornerstones on which the District's comprehensive air quality plan is based. The Engineering Division staff collects information from stationary sources (generally, the larger industrial facilities) annually. The emissions inventory data is reviewed for accuracy and entered into the California Air Resources Board's CEIDARS database. The stationary source inventory is part of a larger overall effort conducted by the District and the state to update the inventory of all sources of air emissions in the County.

RULES AND INCENTIVES PROGRAM DIVISION

To develop rules and regulations protecting public health and welfare leading to the County's attainment and maintenance of state and federal air quality standards.

APCD rules are requirements for business, industry, and the public. These rules result in the reduction or prevention of air pollution. The Division's primary focus is to reduce reactive organic compounds (ROC or hydrocarbons) and oxides of nitrogen (NOx). These two pollutants are responsible for the formation of ozone. Currently, Ventura County does not meet the state or federal ambient air quality standards for ozone. The Division also develops rules to reduce particulate matter (PM), as the county does not meet the state ambient air quality standard for PM. Other rule development activities include air toxic control measures, permit streamlining, new source permitting rules, and administrative rules (fees, etc.). Rules are developed on the basis of need and mandates. They can come from several sources: APCD staff, the California Air Resources Board (ARB), the U.S. Environmental Protection Agency (EPA), the state legislature, or the regulated community.

To minimize the socioeconomic impacts of these rules, staff strives to involve all members of the public that will be affected by each new rule. Draft rules and reports are prepared by staff and disseminated to industries, trade associations, and other interested parties. Multiple public meetings are conducted on each proposed rule revision. Written comments are solicited from industry, the public, the ARB, and the EPA. Draft rules are then presented to the APCD Advisory Committee for their recommendation. The final version of a proposed rule is presented to the Air Pollution Control Board for adoption at a public hearing. After rules are adopted by the Board, compliance assistance advisories are sent to all affected parties.

District staff is also responsible for updating and revising the District's master rulebook. Staff also provides quarterly updates of new rules to a mailing list of subscribers.

To obtain emission reductions from unregulated sources in Ventura County.

The Incentive Programs staff administers various grant programs for the District with the goal of maximizing ozone precursor and particulate emission reductions realized through these programs. Staff works closely with engine manufacturer representatives, representatives of firms manufacturing pretreatment technologies and after-treatment devices, and equipment owners to develop projects meeting the emission reduction goals and program guidelines for the programs administered by staff. Specific programs and targeted emissions are:

- Carl Moyer Memorial Air Quality Standards Attainment Program NOx emission reductions from heavy-duty diesel engines.
- Lower Emission School Bus Program Particulate emission reductions from heavy-duty diesel school buses.
- Reliant Energy Mitigation Program NOx emission reductions.
- Clean Air Fund Ozone precursor emission reductions from any source in Ventura County.

To provide staff support for special air quality projects and programs.

The Incentive Programs staff consults on special projects, such as commenting on legislation; researching and responding to Board comments, questions, and concerns; analyzing EPA and ARB mobile source emission control measures to determine impacts on Ventura County air quality; and, supporting the Bureau of Automotive Repair's enhanced vehicle inspection and maintenance program. Staff represents the District on various mobile sources working groups such as the ARB Incentive Programs Implementation Committee, the National Association of Clean Air Agencies Mobile Sources and Fuels Committee, California Air Pollution Control Officers Association (CAPCOA) Mobile Sources and Fuels Committee, and the ARB Maritime Working Group, and the CAPCOA Climate Protection Committee.

PUBLIC INFORMATION DIVISION

To advance a comprehensive public information air quality agenda for Ventura County.

Public Information (PI) reaches many Ventura County audiences to inform them about air quality. Responsibilities include (1) publications, electronic media & creative materials (2) educational & advertising programs (3) outreach events (4) media relations, and (6) special projects. The PI manager is also an active member of the CAPCOA public information committee.

Publications & Creative Materials

In 2010, over 12,300 pieces of air quality materials, including brochures, booklets, fact sheets, the Skylines newsletter, the DVD Air – the search for one clean breath, and promotional items, were distributed.

Ventura County Climate Change Almanac: This is a 40-page publication with the theme of climate change both at a local and global level. It was published in February 2010. Since that time, PI has distributed 2,500 copies and made the PDF available for download online.

PI also published fact sheet on the District website. These factsheet provide general information on a number of programs including permits, variances, rule development, complaints, and the speaker's bureau, and educator's guide.

PI is also in the initial stages of updating the award winning Book of Air to include new information for 2011.

Outreach

PI staffs and coordinates numerous outreach events each year. Due to staffing, we vary county locations each year so we reach audiences in all parts of the county every few years. April is the busiest time because of many Earth Day activities. In 2010, we participated in Thousand Oaks Earth Day, Amgen Earth Day, and the Living Green Expo at the Simi Valley Towne Center. We also distributed materials to the Earth Day Cal State Channel Islands event, Camarillo Community Garden Earth Day, the City of Ventura, YMCA Healthy Kid's Day, Simi Valley 50+Games, and the County of Ventura Earth Day. In addition, PI did a marketing plan and helped coordinate with County Supervisor Zaragosa's office on the Green Jobs, Climate Change, and the Economy Town Hall Meeting. In total, we reached over 3,100 County residents at these outreach events.

PI showed our film, *Air- the search for one clean breath*, at 5 locations in 2010, to 115 viewers. PI also handles telephone and email requests from residents wanting information about local air quality. This can also involve direct mail of publications to those residents.

Media Relations

PI handles media calls, news releases, and provides local reporters with ideas for feature articles. News conferences, most radio and print interviews, and sponsorships are all coordinated by PI. It also posts information on the APCD Twitter account.

Web sites

PI is responsible for updating its section on the vcapcd.org website as well as doing all the updates for the film website, www.irthefilm.org. In early 2011, PI developed a new website for its public education program, Sky Savers at www.skysavers.org. PI also has an active presence on Twitter. In 2010, PI, with the assistance of the IS division, produced its first You Tube video for our home page. Two more are scheduled for production in 2011.

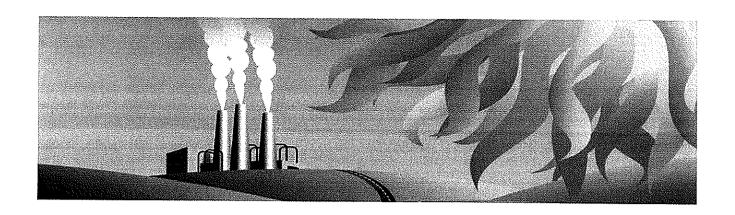

Educational Programs

In 2010, PI distributed the DVD of our award-winning film, Air – the search for one clean breath, to 150 County middle and high school instructors. Information on the web-based Educator's Guide was also distributed. The site had 800 hits in 2010. PI also did a teacher training session at the Oxnard Unified School District.

PI also partnered with the Boys and Girls Club of Ventura County to distribute 1,500 Clean Air Kid's placemats in 2011.

Special Projects

Beginning in 2010, planning started for a new public awareness program, Sky Savers. The program will educate county residents on clean air actions they can take to help the environment by providing them with coupon discounts for local green services and products. It will remind everyone that we all have a stake in the county's clean air efforts. The program will recruit local "green" merchants to offer the discounts. The District will actively promote the program and have a dedicated website where residents can download coupons. The program is scheduled to be introduced spring 2011.

Part III GLOSSARY

Glossary of Terms and Acronyms

Account: A unique identification number and title for a class of expenditures; the most detailed level of budgeting and recording expenditures; also known as the "line item".

Accrual Basis of Accounting: Method of accounting that recognizes the financial effect of transactions, events, and interfund activities when they occur, regardless of the timing of related cash flows.

Activity: An office within a department to which specific expenses are to be allocated.

Administrative Service Charge: An administrative fee charged to funds outside the General Fund for general overhead such as accounting, payroll, budget services and liability insurance.

Adopted Budget: A budget that has been approved by the Air Pollution Control Board.

Air District: A political body responsible for managing air quality on a regional or county basis. California is divided into 35 air districts. (See also air pollution control district).

Air Monitoring: Sampling for and measuring of pollutant levels present in the atmosphere.

AIRNOW: EPA's national air quality website.

Air Pollutant: Any foreign and/or natural substance that is discharged, released, or otherwise propagated into the atmosphere that may result in adverse effects on humans, animal, vegetation, and/or materials. Also known as an air contaminant. Examples include but are not limited to, smoke, charred paper, dust, soot, grime, carbon, fumes, gases, odors, particulate matter, acids, or any combination thereof.

Air Pollution: Degradation of air quality resulting from unwanted chemicals or other materials in the air.

Air Pollution Control District (APCD): The local agency that has authority to regulate stationary, indirect, and area sources of air pollution and governing air quality issues. The APCD proposes and adopts local air pollution rules, enforces those rules, responds to air pollution related complaints, issues permits to polluting sources, inventories sources of air pollution emissions, and conducts air monitoring.

Air Quality Index (AQI): The USEPA recently revised its methods of reporting air quality and the associated health effects. The Air Quality Index replaces the Pollutant Standards Index (PSI) previously used to report air quality to the public. The AQI is a measure of air quality based on a percentage of the federal air quality standard. An AQI of 100 means the pollutant level is equal to the federal standard for that pollutant. An AQI below 100 means the air quality is better than the standard, and above 100 can be considered unhealthful. The higher the number, the more air pollution in the air.

Air Toxics: A generic term referring to a harmful chemical or group of chemicals in the air. Typically, substances that are especially harmful to health, such as those considered under EPA's hazardous air pollutant program or California's AB 1807 and AB2588 toxic air contaminant programs are considered to be air toxics.

Air Toxics "Hot Spots" Information and Assessment Act (AB 2588, 1987, Connelly): AB 2588 was enacted in September 1987. Stationary sources are required to report the types and quantities of certain substances their facilities routinely release into the air. Emissions of interest are those that result from the routine operation of a facility or that are predictable, including but not limited to continuous and intermittent releases and process upsets or leaks.

Allocation: The distribution of available monies, personnel and equipment among various District functions.

Ambient Air: The air that is in the troposphere and is subjected to meteorological and climatic change. Often used interchangeably with "outdoor" air.

Ambient Air Quality Standard: Health and welfare based standards established by the state or federal government for clean outdoor air that identify the maximum acceptable average concentrations of air pollutants during a specified period of time.

American Recovery and Reinvestment Act (ARRA) of 2009: This is commonly referred to as The Stimulus or The Recovery Act, which was an economic stimulus package enacted by the 111th United States Congress in February 2009. The stimulus was intended to create jobs and promote investment and consumer spending during the recession.

Annual Budget: An estimate of expenditures for specific purposes during the fiscal year and the proposed means (estimated revenues) for financing those activities.

Appropriation: An authorization made by the legislative body of a government that permits officials to incur obligations and to make expenditures of governmental resources.

Asbestos: Rule 62.7, the APCD regulates asbestos renovation and demolition projects.

Asset: Anything owned by an individual or a business, which has commercial exchange value. Assets may consist of specific property or claims against others, in contrast to obligations due others.

Assigned fund balance: The portion of fund balance that reflects a government's *intended* use of resources. The intent is established at either the highest level of decision making, or by a body (e.g., Standing Committee) or an official designated for that purpose. The government cannot assign resources that it does not have; thus, the amount reported as assigned fund balance could never exceed total fund balance less its nonspendable, restricted, and committed components.

Atmosphere: The gaseous mass or envelope surrounding the earth. From ground level up, the atmosphere is further subdivided into the troposphere, stratosphere, mesosphere, and the thermosphere.

Attainment: Achievement of air quality standards.

Attainment Plan: In general, a plan that details the emission reducing control measures and their implementation schedule necessary to attain air quality standards. In particular, the federal Clean Air Act requires attainment plans for nonattainment areas; these plans must meet several requirements, including requirements related to enforceability and adoption deadlines.

Audit: A study of the District's accounting system to ensure that financial records are accurate and in compliance with all legal requirements for the handling of public funds, including state law and the District's Policy and Procedures.

Balanced Budget: A budget in which estimated revenues are equal to or greater than estimated expenditures.

Budget (Operating): A plan of financial operation embodying an estimate of proposed expenditures for a given period of time and the proposed means of financing them.

Build America Bond Program: This was created by the American Recovery and Reinvestment Act of 2009, which authorizes state and local governments to issue Build America Bonds as taxable bonds in 2009 and 2010 to finance any capital expenditures for which they otherwise could issue tax-exempt governmental bonds. State and local governments received a direct federal subsidy payment for a portion of their borrowing costs on Build America Bonds equal to 35 percent of the total coupon interest paid to investors.

California Air Resources Board (ARB or CARB): The State's lead air quality agency consisting of an eleven-member board and several hundred employees. CARB is responsible for attainment and maintenance of the state and federal air quality standards, and is fully responsible for motor vehicle pollution control. CARB oversees county and regional air pollution management programs.

California Clean Air Act of 1988 (CCAA): The CCAA are the amendments to the California Health and Safety Code resulting from the passage of Assembly Bill 2595. A California law passed in 1988 that provides the basis for air quality planning and regulation independent of federal regulations. A major element of the Act is the requirement that local APCDs in violation of state ambient air quality standards must prepare attainment plans that identify air quality problems, causes, trends, and actions to be taken to attain and maintain California's air quality standards by the earliest practicable date.

California Environmental Quality Act (CEQA): A California law that sets forth a process for public agencies to make informed decisions on discretionary project approvals. The process aids decision makers to determine whether any environmental impacts are associated with a proposed project. It requires environmental impacts associated with a proposed project to be identified, disclosed, and mitigated to the maximum extent feasible.

Capital Outlay: The purchase of items that cost over \$5,000 and have a useful life of more than one year.

Carl Moyer Fund: A multi-million dollar incentive grant program designed to encourage reduction of emissions from heavy-duty engines. The grants cover the additional cost of cleaner technologies for on-road, off-road, marine, locomotive, and agricultural pump engines, as well as forklifts and airport ground support equipment.

Cash Basis of Accounting: Records all revenues and expenditures when cash is either received or disbursed.

Committed funds: Amounts that can be used only for specific purposes determined by a formal action of the government's highest level of decision-making authority (e.g., Air Pollution Control Board for the District) and can only be changed or lifted by the same government, taking the same formal action that originally imposed the constraint.

Consumer Products: Products such as detergents, cleaning compounds, polishes, lawn and garden products, personal care products, and automotive specialty products that are part of our everyday lives and, through consumer use, may produce air emissions which contribute to air pollution.

Contingency: An estimated amount of funds needed for deficiency, contingent or emergency purposes.

Deficit: (1) The excess of an entity's liabilities over its assets; (2) The excess of expenditures over revenues during a single accounting period.

Depreciation: The amount of expense charged against earnings by a company to write off the cost of an asset over its useful life, giving consideration to wear and tear, obsolescence, and salvage value.

Department: An organizational and/or budgetary unit established by Air Pollution Control Board to carry out specified public services and implement policy directives.

Disbursements: Funds actually expended.

Division: An organizational and/or budgetary unit within a department.

Encumbrance: An obligation in the form of a purchase order, contract or salary commitment that is chargeable to an appropriation, and for which part of an appropriation is reserved. These obligations become disbursements upon payment.

Emission Factor: For stationary sources, the relationship between the amount of pollution produced and the amount of raw material processed or burned. For mobile sources, the relationship between the amount of pollution produced and the number of vehicle miles traveled. By using the emission factor for a pollutant and specific data regarding quantities of materials used by a given source, it is possible to compute emissions for the source. This approach is used in preparing an emissions inventory.

Emission Reductions: The amount of emissions that will be reduced due to the implementation of a control measure. Emission reductions can be calculated by finding the product of the emissions and the control efficiency.

Employee benefits: The cost of payroll fringes including insurance, retirement, uniforms, etc.

Environmental Protection Agency (EPA): The United States agency charged with setting policy and guidelines, and carrying out legal mandates for the protection of national interests in environmental resources.

Expenditures: The amount of money, cash or checks actually paid or obligated for payment from the treasury.

Expenses: Charges incurred, whether paid or unpaid, for operation, maintenance, interest, and other charges presumed to benefit the current fiscal period.

Facility: A structure, building, or operation that has one or more permitted pieces of equipment.

Fiscal Year: A twelve (12) month period of time for which the budget applies (the District's fiscal year is July 1 through June 30).

Fixed Assets: Land, improvements to land, easements, buildings, building improvements, vehicles, machinery, equipment, infrastructure, and all other tangible or intangible assets that are used in the operations and that have initial useful lives extending beyond a single reporting period.

Forecast: Estimate of the expected financial position and the results of operations and cash flows based on expected conditions.

Full Time Equivalent (FTE): The amount of funding budgeted for a particular position.

Fund: A set of interrelated accounts which record assets and liabilities related to a specific purpose. Also, a sum of money available for specified purposes.

Fund Balance: The excess of the district's assets over its liabilities. Typically, excess revenues over expenditures at year-end will increase a fund's fund balance.

Federal Clean Air Act (FCAA): A federal law passed in 1970 and amended in 1977 and 1990 that forms the basis for the national air pollution control effort. Basic elements of the act include national ambient air quality standards for major air pollutants, planning requirements, permitting requirements, air toxics standards, acid rain control measures, and enforcement provisions.

GAAP: Generally Accepted Accounting Principles. The guiding conventions, rules, and procedures that define accepted accounting practice at a particular time in the United States.

Grant: A contribution of assets by one governmental unit or other organization to another. Typically, these contributions are made to local governments from the state and federal governments. Grant moneys are usually dedicated for specific purposes.

Governmental Accounting Standards Board (GASB): An independent, private-sector, not-for-profit organization that—through an open and thorough due process—establishes and improves standards of financial accounting and reporting for U.S. state and local governments. Governments and the accounting industry recognize the GASB as the official source of generally accepted accounting principles (GAAP) for state and local governments.

GASB Statement No. 54 Fund Balance Reporting and Governmental Fund Type Definitions: Enhances the usefulness of fund balance information by providing clearer fund balance classifications that can be more consistently applied and by clarifying the existing governmental fund type definitions. This Statement classifies fund balance as restricted, committed, assigned, and unassigned based on the relative strength of the constraints that control how specific amounts can be spent.

Hazardous Air Pollutant (HAP): An air pollutant listed under section 112 (b) of the federal Clean Air Act as particularly hazardous to health. Emission sources of hazardous air pollutants are identified by USEPA, and emission standards are set accordingly.

Hydrocarbon: Any of a large number of compounds containing various combinations of hydrogen and carbon atoms. They may be emitted into the air as a result of fossil fuel combustion, fuel volatilization, and solvent use, and are a major contributor to smog.

Incentives: Measures designed to encourage certain actions or behavior. These include inducements for the use of carpools, buses, and other high-occupancy vehicles in place of single occupant automobile travel. Examples include carpool lanes, preferential parking, and financial incentives.

Lawn Mower Exchange Program: Clean Air Fund Project that replaces gasoline powered lawnmowers with electric lawnmowers. VCAPCD partners with Lowes and other vendors for the exchange program.

Liability: Debt or other legal obligation arising out of transactions in the past which must be liquidated renewed or refunded at some future date.

Line Item Budget: A detailed budget, classified by object, within each organizational unit, and including each account utilized.

Lower Emission School Bus Program: A program administered by APCD, using state funds, to replace and retrofit older school buses.

Mitigation: Actions related to a proposed project that reduce or eliminate adverse environmental impacts. Mitigation can be in the form of traditional offsets, transportation-based mitigation measures that are directly associated with the project under consideration, or mitigation fees to be used to secure off site mitigation.

Mobile Source: Sources of air pollution such as automobiles, motorcycles, trucks, buses, off-road vehicles, boats, and airplanes. (Contrast with stationary sources.)

Modified Accrual: Basis of accounting for all governmental funds and expendable trust and agency funds under which revenues are recorded when they become measurable and available. Expenditures are recorded when the liability is incurred, except for interest on general long-term obligations which is recorded when due.

Nonspendable funds: Amounts are not in a spendable form or are required to be maintained intact (e.g. inventories, prepaid, or principal of an endowment).

NSR (New Source Review): A program used in development of permits for new or modified industrial facilities that are in a nonattainment area, and which emit nonattainment criteria air pollutants. The two major requirements of NSR are Best Available Control Technology and Emission Offsets.

Operating Budget: Authorized expenditures for on-going district services.

Other Charges: Includes debt service, operating transfers between funds, insurance, and transfers to other entities.

Other Services: includes consulting, utilities, maintenance, rents, travel, etc.

Ozone: A reactive chemical gas consisting of three oxygen atoms. It is a product of the photochemical process involving reactive organic compounds and nitrogen oxides. Ozone exists in the upper atmosphere ozone layer as well as at the earth's surface. Ozone at the earth's surface causes numerous adverse health effects and is a criteria air pollutant. It is a major component of smog.

Personal Services: Expenditures that represent the cost of salaries and wages.

Permit: Written permission and authorization from an air district that allows for the construction and/or operation of an emission generating facility or its equipment within certain specified limits and conditions.

PM (Particulate Matter): Any material, except uncombined water, that exists in the solid or liquid state in the atmosphere, such as soot, dust, smoke, and aerosols. The size of particulate matter can vary from coarse, wind blown dust particles to fine particulate combustion byproducts.

PM10 (Particulate Matter less than 10 microns): A major air pollutant consisting of tiny solid or liquid particles of soot, dust, smoke, fumes, and aerosols. The size of the particles is 10 microns or less.

PM2.5 (Particulate Matter less than 2.5 microns): A major air pollutant consisting of tiny solid or liquid particles, generally soot and aerosols. The size of the particles (2.5 microns or smaller) allows them to easily enter the air sacs deep in the lungs where they may cause adverse health effects.

Policy: A definite course of action adopted after a review of information and directed at the realization of goals.

Position: A position is present if an employee is permanent and their duties have been authorized by the Air Pollution Control Board.

Portable Engine Registration Program (PERP): A state program which allows portable equipment to be registered throughout California. The program is administered by CARB and enforced by air districts.

Program: Collection of work-related activities initiated to accomplish a desired end. A designation within the account structure to distinguish separate functions within a department.

Proposed Budget: The recommended budget that has been prepared by the Air Pollution Control District Fiscal Division and forwarded to the Board for approval.

Purchase Order: An authorization and incurring of debt for the delivery of specific goods or services.

Reimbursements: Fees received as payment for the provision of specific district services.

Reserves: An account used to indicate that portion of fund equity, which is legally restricted for a specific purpose or not available for appropriation and subsequent spending.

Resolution: A special order by the legislative body, authorizing an action to occur. The Air Pollution Control District budget is adopted by Air Pollution Control Board resolution.

Restricted funds: Amounts subject to specific purposes as stipulated by externally enforceable legal restrictions, constitution or through enabling legislation.

Revenue: Additions to the District's financial assets (such as permits and grants) which do not in themselves increase the District's liabilities or cancel out a previous expenditure.

Ridesharing: A cooperative effort of two or more people to travel together. Examples are carpools and vanpools.

Rule 47: District Rule 47, Source Test, Emission Monitoring, and Call-Back Fees.

Source: Something that produces air pollution emissions. Sources can be stationary or mobile, and anthropogenic or natural.

Special Revenue Fund: Funds used to account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects. The restricted or committed proceeds of specific revenue sources should be expected to continue to comprise a substantial portion of the inflows reported in the fund.

Surplus: Revenues that exceed expenses for a specific period of time.

State Subvention Funds: State funds provided to air districts on a per capita basis, with minimum funding levels to rural air districts.

Supplies: Includes laboratory and office supplies, postage, repair parts, and inventory purchases.

Title V: Title V of the federal Clean Air Act requires major stationary sources of air pollution and a limited group of non-major sources to obtain federal operating permits that assure compliance with all applicable federal air pollution control requirements.

Unassigned fund balance: The residual classification for the general fund and includes all amounts not classified as nonspendable, restricted, committed or assigned.

United States Environmental Protection Agency (USEPA): The federal agency charged with setting policy and guidelines, and carrying out legal mandates for the protection of national interests in environmental resources.

Variance: This is issued by the Hearing Board to businesses to temporarily grant relief, under certain circumstances, from the requirements of a District regulation or state law. It is official permission to temporarily exceed limits set by state laws or APCD rules and regulations.

Vapor Recovery Systems: Systems to recover vapors associated with the storage and transfer of petroleum products and reactive organic compound liquids.

Ventura County Air Quality Assessment Guidelines: An advisory document prepared by the District that provides lead agencies, consultants, and project applicants with a framework and uniform methods for preparing air quality impact assessments and the air quality section of environmental documents for projects that require discretionary entitlements.

105 Grant: Clean Air Act Section 105 Grant that provides continuing support for activities which include strategic planning and evaluation, compliance, developing state implementation plans, monitoring air and emissions, rulemaking, operating permits, and all other program related activities.

103 Grant: Clean Air Act Section 103 Grant that provides continued funding for implementing a nationwide fine particulate (PM2.5) monitoring network.
