Monthly Report of the Ventura County Air Pollution Control District 

## Greenhouse Gas Update – spring 2012

by Don Price, P.E., VCAPCD air quality engineer

APRIL 2012

Despite a distinct lack of interest at the federal level, greenhouse gas reduction efforts are making progress in California. On January 27, the California Air Resources Board adopted new regulations that will require more zero-emission or low-emission vehicles to be available by the beginning in 2018. Also, other new cars will be required, by 2025, to reduce smog-forming pollutants by 75 percent and greenhouse gas emissions by 33 percent.

As electric vehicles become more available, retailers like Walgreens, Macy's, Kohl's and Best Buy are installing electric vehicle charging station at many locations. Although the total number of electric vehicles is still relatively small, retailers believe that chargers will enhance their "green" reputation and generate good will from consumers. This is particularly important for Generation Y consumers, who are known to want fuel-efficient, technology-packed vehicles.

In other energy news, the California Energy

Commission has set its sights on "vampire" charging systems, which consist of mostly of "wall-wart" AC to DC chargers. Up to 60 percent of the energy these systems consume is wasted in excess heat. Efforts will be taken to make these chargers more efficient. Energy efficiency is still the cheapest form of renewable energy, much cheaper than wind or solar photovoltaic.

Speaking of solar energy, several solar thermal power plants are either planned or under construction in the Southern California desert. Despite their isolated

locations, environmental impacts are still a concern. Both environmental and Indian cultural issues have slowed a Genesis Solar Energy Project near Blythe. In addition, progress is being made in getting these projects connected to the power grid.

Regarding the California Global Warming Solution Act of 2006 (AB32), the Air Resources Board (ARB) has met their schedule and is on track to reduce greenhouse gas emissions to 1990 levels by December 31, 2020. It remains unclear how local air districts like us will be assisting ARB in their efforts, but the District's vast knowledge of local sources of air pollution could be essential in their work to curb global climate change.

To schedule a presentation on climate change, call Price at 805/645-1407.

## AirLines

**STEM event:** The District will participate in the *STEM EXPO: Exploration of Science, Technology, Engineering, and Math* at the **Ventura County Fairgrounds** on March 21. The annual event is open to Ventura County middle and high school students and is coordinated by **California State University Channel Islands**.

**Check us out.** The APCD will have a booth at the **Earthday Camarillo** celebration on April 21 from 10am until 4pm at

**Camarillo Community Center.** The center is located at 1605 Burnley St., Camarillo. Earthday Camarillo is organized by Camarillo Community Gardens, a non-profit group dedicated to making organic gardening opportunities available to the public. Stop by and say hello.

Thanks to **Channel Islands National Park's Tidepools to Schools Program**, 600 **Skykeeper Activity Books** will go to County school children. The District has

been partnering with the National Park for several years in educating kids on air and water quality.

**Destination: Clean Air** is the latest publication from the APCD. It outlines District functions and organization. If you would like a copy, call **645-1415** or you can download it from the District website.

*Put your head in the clouds ...*

Really. At the Ventura County Air Pollution Control District, air is our focus. Over the years we have created school programs that have taught thousands of County students about the air they breathe. Healthful air quality is a legacy to our children that we must safeguard. We can do this by teaching them the importance of clean air and what actions they can take now and in the future to ensure this natural resource is protected. Our current projects include:

- The Skykeeper Activity Book & Placemat for elementary school students.
- The Educator's Guide for the award-winning film, *Air—the Search for One Clean Breath*, available at [airthefilm.org](http://airthefilm.org) (grades 6 - 12).
- The Ventura County Climate Change Almanac for high school and college students.

Contact public information manager Barbara L. Page at [barbara@vcapcd.org](mailto:barbara@vcapcd.org) for more information. And keep your head in the clouds by visiting [vcapcd.org](http://vcapcd.org).

This ad appeared on February 29 in the *winter 2012 Focus on Education* supplement in the Ventura County Star. The publication is a not for profit, informative newsletter that reflects the image, culture and philosophy of the Ventura County Office of Education. *Focus on Education* is printed and distributed countywide in the Ventura County Star and is devoted to education and education related issues that affect Ventura County. It is featured in the Star in February, June and September.
