

NOTICE OF PUBLIC HEARING

Proposed Amendments to Rule 74.20, Adhesives and Sealants

The Air Pollution Control Board will meet to consider the adoption of proposed amendments to Rule 74.20. Staff is proposing to reduce Reactive Organic Compound (ROC) emissions from the use of adhesives and sealants in the county.

This rule will implement an All Feasible Measures requirement of the California Clean Air Act (H&SC Section 40914). Ventura County APCD's Air Quality Management Plan relies on adopting All Feasible Measures to help attain the state ambient ozone air quality standard. The proposed rule and staff report have been posted to the district website on the rule development page (www.vcapcd.org).

The meeting will be held at the following time and location:

Tuesday – October 9, 2018
1:30 p.m.
Board of Supervisors Meeting Room
Ventura County Government Center
800 S. Victoria Avenue
Ventura, CA

These amendments to Rule 74.20 are based on the 2017 amendments to South Coast AQMD Rule 1168, but do not include those future ROC content limits that require the completion of a technology assessment prior to the effective date of the standard. Staff has worked closely with the adhesives industry to address all concerns. The proposed rule without any changes was unanimously recommended by the Advisory Committee on August 28th.

The public is invited to attend this hearing and provide comments to the Board. Contact Stan Cowen at (805) 645-1408 or email stan@vcapcd.org if you have any questions or comments.
