

The U.S. Department of Energy and its contractors, along with the California Department of Toxic Substances Control (DTSC) re-entered the Santa Susana Field Laboratory on Sunday, November 11 and confirmed that Area IV and the Northern Buffer Zone have not been impacted by the Woolsey Fire. All DOE facilities are untouched. The Department continues to conduct routine monitoring on-site and is providing raw data to DTSC and other state and federal agencies, as requested. The Department is continuing to watch the Woolsey Fire closely and will provide updates as needed.
